EDUCATION

FAST - National University of Computer and Emerging Sciences, Islamabad **Graduation: June 2026**
Bachelor of Science in Software Engineering
Core Focus: System Design, Web Engineering, DevOps, Distributed Databases, and Software Project Management

Emalah Foundation College, Rawalpindi, Punjab **2022**
F.Sc (Physics, Chemistry, Mathematics)

TECHNICAL SKILLS & TOOLS

- **Languages:** JavaScript (ES6+), Python, C++, Java, Solidity, SQL.
- **Frontend Development:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Redux, Context API.
- **Backend & Databases:** Node.js, Express.js, FastAPI, Flask, REST APIs, WebSockets, JWT, MongoDB, Mongoose, MySQL, Supabase SQL.
- **DevOps & Tools:** Docker, Kubernetes (Minikube), GitHub Actions, CI/CD Pipelines, Git, Postman, Linux/Ubuntu.
- **Core Concepts:** Data Structures & Algorithms (DSA), OOP, System Design, Cloud Architecture, Requirement Engineering.

WORK EXPERIENCE

Full-Stack Developer (Contract) — Orixity (Remote) **Sep 2025 – Jan 2026**

- Engineered scalable web architectures utilizing both MERN and MEAN stacks to support concurrent user sessions.
- Designed secure RESTful APIs integrated with JSON Web Tokens (JWT) and optimized relational/non-relational database schemas.
- Translated evolving functional requirements into technical specifications, reducing system execution latencies.

Web Developer Intern — DataX (Remote) **June 2024 – Aug 2024**

- Built responsive, modular user interfaces with React.js, HTML5, and Tailwind CSS, aligning with strict UI/UX mockups.
- Collaborated with cross-functional development teams in an Agile/Scrum environment to ship production-ready frontend features.

PROJECTS

Final Project: DataChain (Verifiable Dataset Marketplace) **Completion: May 2026**
Tech Stack: Solidity, Hardhat, Ethereum/Polygon, IPFS, React.js, Node.js, Python, ZoKrates, Scikit-learn

- Architected a decentralized Web3 marketplace allowing trustless exchange of AI datasets via smart contracts (Escrow, Registry, Reputation).
- Designed a Zero-Knowledge Proof (ZKP) module with ZoKrates for privacy compliance and integrated IPFS for tamper-proof storage.
- Implemented autonomous AI agents for dataset validation and automated dispute resolution along with a MetaMask-integrated dashboard.

Selected Semester Projects

- **Ecommerce Storefront [Next.js, Supabase, Tailwind]:** Developed a full-stack e-commerce app with product listings, user carts, dynamic client-side routing, and secure Supabase database bindings via Node API routes.
- **Real-Time Chat Application [MEAN, Socket.io]:** Programmed a stateful messaging system featuring asynchronous group workspaces, persistent chat history logs, and instant socket-driven client notifications.
- **ArtistryPanel [React, Node.js, MongoDB]:** Built an asset-sharing platform enabling digital creators to index and showcase files.
- **Movie Recommendation Engine [JavaScript, TMDb API]:** Formed an asynchronous web app consuming third-party REST API feeds.
- **Enchanted Labyrinth Explorer [C++]:** Constructed an interactive engine utilizing advanced graph topologies and data structures.
- **Dodge'em Game [C++]:** Designed an object-oriented prototype implementing clean inheritance, encapsulation, and reusable classes.

ACHIEVEMENTS, TRAININGS & ACTIVITIES

- **Achievements:** Successfully designed and launched multiple cloud-ready full-stack applications; orchestrated container configurations and automated deployment pipelines using Docker, localized Minikube environments, and GitHub Actions.
- **Trainings:** Completed advanced specializations in MERN/MEAN architectures and enterprise DevOps patterns through focused coursework.

- **Activities:** Open-source developer and active GitHub contributor maintaining clean code structures and well-documented repositories.
